

EYE CARE

Eyebrow Shaping (10mins)

Eyebrows are your most important feature, providing a frame for your face. We'll accent your natural size and shape with careful trimming and tweezing to create balance, symmetry and harmony.

Eyebrow & Eyelash Tint (20mins)

Eyebrow tinting compliments coloured hair and adds definition to the face shape. Eyelash tinting enhances the general appearance of the eyes and is ideal for eyes sensitive to mascara. If the lashes are naturally fair, having them tinted will create a much more dramatic look for your eyes.

Individual Eyelashes (20mins)

Lashes come in short, medium and long and last for few days.

Semi Permanent Eye Lashes (70mins)

These synthetic semi-permanent lashes are bonded individually to your natural lashes to enhance your eyes and give your lashes the desired length and volume. Lashes will last for around three weeks before a maintenance refill is needed.

Eye Treatment (30mins)

This treatment is designed to minimise eye puffiness and dark circles, and prevent ageing in the delicate areas of the eyes. An eye mask is also applied.

Microcurrent Eye/ Neck Treatment (30mins)

During this treatment microcurrent is used to help tone, lift and drain the puffiness around the eye area. Instant results achieved which can be prolonged by a number of sessions.

Medik8 Eye Peels (30mins)

This treatment helps minimise and improve appearance of fine lines around the eye area.
